

It's what's inside...

Most vinyl fence and railing profiles appear the same, the same that is until you take a closer look. A closer inspection of fence and railing extrusions from VEKA Innovations will reveal our unique "blue" core.

This blue co-extruded substrate indicates that you have purchased a fence and railing system that is backed by the most comprehensive warranty in the industry today.

VEKA Innovations

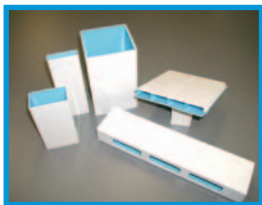

presents

VEKA **blue**™
inside

...that makes the
difference outside.

VEKA**blue**™ inside

VEKA

has been leading the world in rigid vinyl profile formulating, compounding,

and extrusion for over 33 years. With 16 facilities in 14 countries, VEKA is unsurpassed in the industry.

At VEKA, we pride ourselves on building long-lasting relationships with our customers and the community, with service and environmental friendliness always being a primary goal. To further heighten environmental awareness, VEKA Innovations is proud to announce VEKAblue™, the latest breakthrough in coextrusion technology.

VEKA has one of the most highly computer integrated blending facilities in the world. In this facility we have the ability to weigh micro ingredients to the 1/100 of one pound. Batch after batch, the VEKAblue™ substrate will adhere to the strict standards ASTM F-964 and D-1784, which assure proper tensile strength, impact resistance, heat distortion, expansion contraction, flexural modulus flattening, capstock thickness and weatherability.

With VEKAblue™ inside, it is easy to identify VEKA's extra thick capstock, which is a key factor in durability and weatherability. VEKA's in-house accelerated weathering equipment coupled with years of actual outdoor exposure all over the world have given the company the knowledge to formulate and blend a capstock that adheres to ASTM requirement for weatherability. VEKA's profiles are also tested according to the American Architectural Manufacturers Association (AAMA) lineal certification program, which requires that the finished profiles be tested for shrinkage, impact and dimensional stability at regularly prescribed intervals. In addition, VEKA maintains its own 3-tier quality assurance program with go gauges based on statistical process control (SPC).

The result of years of experience and unmatched quality assurance allows VEKA to offer one of the best warranties in the business. Because VEKA's product is so easy to identify, VEKAblue™ carries a no hassle limited lifetime extended warranty*. This amazing warranty is also transferable between homeowners and covers not only the replacement profiles but also installation.

When choosing your vinyl profile provider go with the best the industry has to offer... VEKA Innovations. Contact your local salesperson today at 1-888-GO4-VEKA for more information.

* This limited warranty is applicable to certain residential properties in certain states in the Continental United States to the original purchaser of the covered products and may be transferred to one subsequent owner of the property on which the products are installed. The warranty must be registered within 30 days of purchase or transfer. Contact VEKA for a complete warranty.
